PEACHTREE STAYSAFE IMPACT PRODUCTS BEAUTIFULLY PROTECT COASTAL HOMES

MOSINEE, Wis., — Peachtree® Doors and Windows StaySafe™ impact-resistant windows and doors combine the endearing beauty, upscale options and reliability of Peachtree's 700 Series with the resolute protection of Zo-e-shield™ Coastal laminated glass, and inconspicuously reinforced sash, frames and hardware. The result is attractive windows and doors able to withstand the forces of nature.

Zo-e-shield Coastal glazing is comprised of an impenetrable layer of polyvinyl butyral (PVB), at least .090" gauge, bonded between two panes of glass. This laminated interlayer remains intact when the outer layers of glass break, thereby providing security in the event of blunt-force contact. As added benefits, it also dampens sound and deflects 99.9 percent of UV rays for greater overall comfort inside the home. With multiple layers of Low E² coatings, EasyCare® exteriors, Real Warm Edge® spacers and a mixture of inert-gas-filled airspaces, Zo-e-shield Coastal also delivers industry-best UV-factors and solar heat gain coefficients to help reduce a home's heating and cooling costs. StaySafe products are available as single-glazed impact products for Miami-Dade counties and as insulated impact products for northern coastal climates. All of the insulated glass products have been tested to Missile level D in accordance with ASTM 1886 and ASTM 1996.

"The peace of mind that comes with StaySafe products is invaluable for homeowners in coastal areas," said Jeff Kibler, Peachtree brand manager. "But these windows and doors are as beautiful as they are practical. You won't notice unsightly hardware or reinforced components. Just great looking windows and doors that offer the ultimate in protection, energy efficiency and convenience."

StaySafe products have durable, extruded aluminum clad exteriors that promise little maintenance. Exteriors are available in standard, designer and custom-matched colors to accentuate any exterior. Interior wood options of standard pine, or oak,

(more)

mahogany, maple, American fir or cherry can be primed or prestained in Clear Satin, Golden Oak, Fruitwood or Chestnut for a consistent finish to match other interior millwork.

Peachtree's StaySafe products include French out-swing and sliding patio doors, and easy-tilt double hung, casement (in one-, two-, three- and four-wide configurations), awning, and direct set/picture windows.

Patio doors have 1-3/4" or 2-1/4" door panels constructed from kiln-dried, select western wood that resists warping. Door stiles have a Laminated Veneer Lumber (LVL) core to further enhance the doors' structural integrity. French hinged doors have stainless steel multi-point locks with reinforced strike plates for added protection from the elements.

Corrosion-resistant coastal hardware packages coordinate nicely with any of the StaySafe products. Multiple weather stripping maximizes the products' energy efficiency and further ensure a weather-tight seal. An integral nailing fin simplifies installation and provides additional structural stability.

StaySafe products are available in several grille styles for added character: Simulated Divided Lites (SDL), 5/8" flat or 3/4" profiled Grilles-Between-The-Glass (GBG), Optically Divided Lites (ODL) and interior Snap-in Removable Wood Grilles.

Peachtree's whole house offering is complete with entry door systems in a variety of textures, finishes and panel styles. Peachtree's new entry door line includes the Rustic Collection, Mahogany Collection, Oak Collection and Smooth Collection of fiberglass entry door systems.

About Peachtree

Peachtree Doors and Windows has been manufacturing millwork products since 1959. Headquartered in Mosinee, Wis., Peachtree manufactures and markets wood windows and patio doors, and steel and fiberglass patio and entry door systems. Products are sold nationwide through home improvement retailers and building materials dealers. For more information about Peachtree's complete product line, visit peachtreedoor.com or call 800.732.2499.
