PEACHTREE'S VERSATILE AND BEAUTIFUL 700 SERIES PROVIDES WIDE RANGE OF CUSTOM OPTIONS

GAINESVILLE, Ga. – Peachtree® Doors and Windows meets custom builders' one-of-a-kind requests with the 700 Series of aluminum clad windows and patio doors. The 700 Series is a complete line of windows and patio doors available in custom sizes, styles and options to tailor a single window or an entire window and patio door package.

"Today's home plans are more elaborate than ever," said Jeff Kibler, Peachtree brand manager. "Designers and architects create homes with personal flair that suits their individual clients' lifestyles. The 700 Series helps bring unique ideas to reality. Whether it's a custom-shaped window or grille pattern, or an elaborate combination of windows and transoms, Peachtree's 700 Series can deliver according to specs."

Tailor Made From the Inside Out

The 700 Series' tailor-made features begin from the inside out. The interior is available in standard pine or one of five hardwood interiors: alder, oak, mahogany, maple or cherry, each of which comes ready to finish to match a home's other millwork. Hardware is available in white, clay, brass, oil-rubbed or brush nickel. Double hung windows feature recessed cam locks while casements have a tandem locking system. Patio doors derive added strength and security from stainless steel multi-point locking systems.

(more)

The 700 Series' standard warm-edge spacer system helps ensure optimal thermal performance. A number of glazing choices, including Low E² insulated glass, argon-filled glass, Turtle glass, tinted, obscured or tempered glass, further protect the home from mother nature. Optional EasyCare™ Glass, a high performance Low E² 3/4" insulated glass, helps keep windows cleaner longer.

Three grille styles are available in standard or custom shapes with the 700 Series. These include simulated divided lites (SDL), grilles-between-the-glass (GBG) and interior full surround wood grilles.

The extruded aluminum clad exteriors on the 700 Series are dent resistant and virtually maintenance free. Cladding is available in eight standard colors: Classic White, Ivory, Pebble Tan, Forest Green, Obsidian, Brick Red and Sierra Brown; 48 special order designer colors; or custom color match. To complement the 700 Series windows and patio doors, Peachtree's entry door frames also can be specified in aluminum cladding to the outside and hardwood or standard pine interiors.

The 700 Series also includes several choices in hinged and patio doors and transoms to complement a 700 Series window package. Hinged patio doors are available in a 1-3/4" standard panel or 2-1/4" solid wood premium panel. All have multi-point locking mechanisms, and four fully adjustable hinges for extra security. For a historical or traditional look, Peachtree offers a raised panel for its hinged patio doors. Sliding patio doors are available in traditional-stile and wide-stile French designs with heavy-duty dual tandem rollers and spring-loaded security foot bolts. All of the Peachtree 700 Series patio doors are available with the same hardwood interiors and extruded aluminum clad exteriors as the 700 Series windows.
